What if.....

What if we understood that:

There are parallel universes

We could access other universes for our benefit

All probable outcomes exist and are accessible to us

The past is as changeable as the future

Atlantean ancestors exist and are telling the future

What do these ideas have to do with the latest theories on quantum physics and the string theory? Mayan prophecies are over 10 million years old and yet they specifically mention what is happening in today's global events including the situation in Iraq as well as changes in world religions.

The most important Mayan teaching involves the expansion of human consciousness. How will this be accomplished? Learn about these changes from someone who has studied and even spent time among the Mayans for years.

Bring your pendulum and a piece of paper to answer questions.

Nancy Clark, PhD, is a psychotherapist, medical intuitive and international lecturer. Dr. Clark is the author of several books in many languages, plus video and audiotapes. Nancy is the director of Arizona Integrative Therapies. In addition to

intuitive counseling and an energy healing practice, she teaches a variety of subjects including a 100-hour seminar providing study and clinics in Medical Intuitive Certification.romo
